AI PITCH DECK BUILDER FOR FOUNDERS

Go from your website to an investor-ready deck.

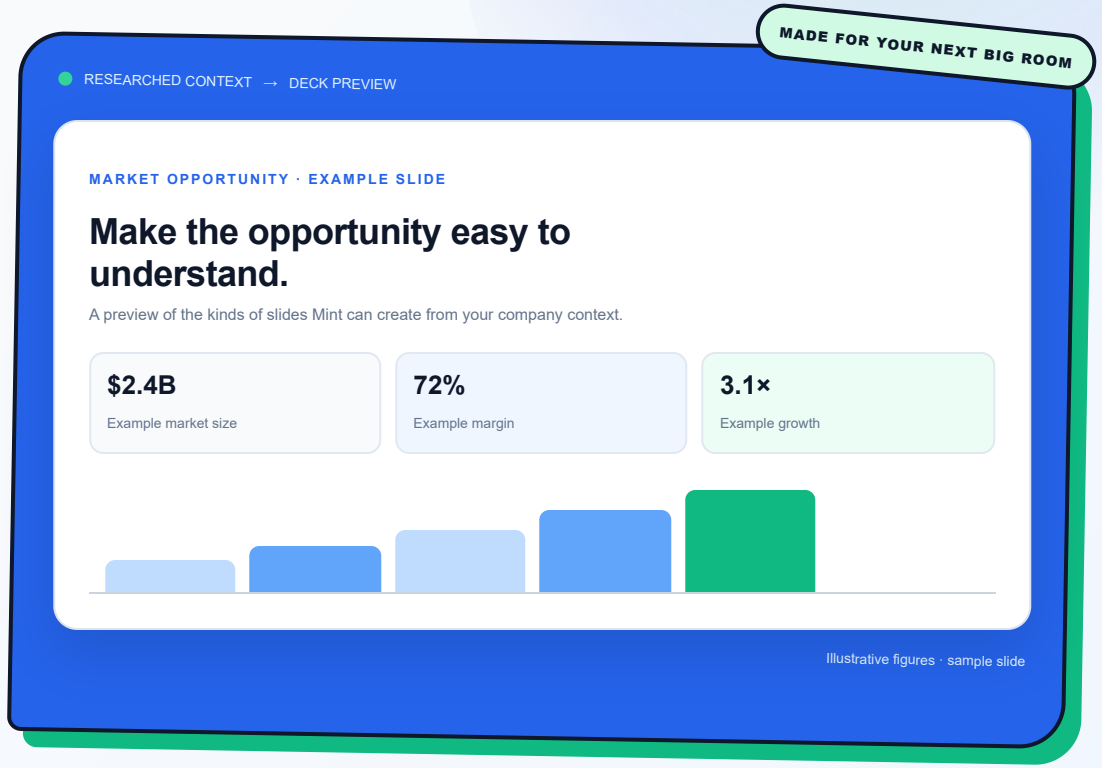

Mint researches your company and market, then builds a structured pitch deck you can edit and export as PowerPoint.

Your company website

Create my deck →

Start with your website. Refine every slide. Export a .pptx.

A CLEAR JOURNEY, SHOWN AT A GLANCE

From company context to a deck you can shape.

Turn the current “How it works” section into a visual sequence that makes the product easy to understand in seconds.

01 · INPUT

Start with your site

Share your website and company details so Mint starts with relevant context.

→

02 · RESEARCH

Build from evidence

Gather live market, competitor and comparable-company information.

→

03 · STORY

Choose the right structure

Select a deck type to shape the narrative for the audience and purpose.

→

04 · OUTPUT

Edit and export

Refine slide text, explore designs and download a PowerPoint file.

Make the workflow itself the infographic.

Use the same visual language—navy surfaces, cobalt for the primary action and emerald for progress—to connect the website input to the finished editable deck.

WEBSITE → RESEARCH → PITCH DECK

Proof points visitors can scan.

deck types, built for different rooms	visual designs, reusable across decks	slides, based on the deck type	research and writing passes

ORGANIZE THE CURRENT USE CASES

One platform. Four kinds of business conversation.

Turn the current 13-item deck list into a visual map, grouped by the job the presentation needs to do.

↗

Raise

Build a clear fundraising narrative.

Investor · Demo day · Elevator · Update

◎

Sell & partner

Explain value to customers and partners.

Sales · GTM · Product · Partnership

▤

Explain

Share the business and its direction.

General · Business · Vision · Master

✓

Decide

Make an internal case for action.

Internal

Why this helps

Visitors can recognize their own presentation need before scanning individual deck names. Keep the actual deck types visible inside each group so the feature remains specific.

Keep the claims grounded

Show the live deck preview next to these groups. Label all sample data as illustrative; use only real product output as proof.

MAKE 40 DESIGNS EASIER TO COMPARE

Choose a visual style. Keep the same story.

A family grid helps visitors scan the design system without presenting it as a separate template marketplace.

40 **designs, one deck at a time.**
Switch designs on the deck you already made. Your content stays in place while the visual direction changes.

Show representative slides, not tiny thumbnails alone.

Use a real sample slide

Let a visitor inspect one slide at a readable size, then offer the visual-family grid as a fast way to explore variations.

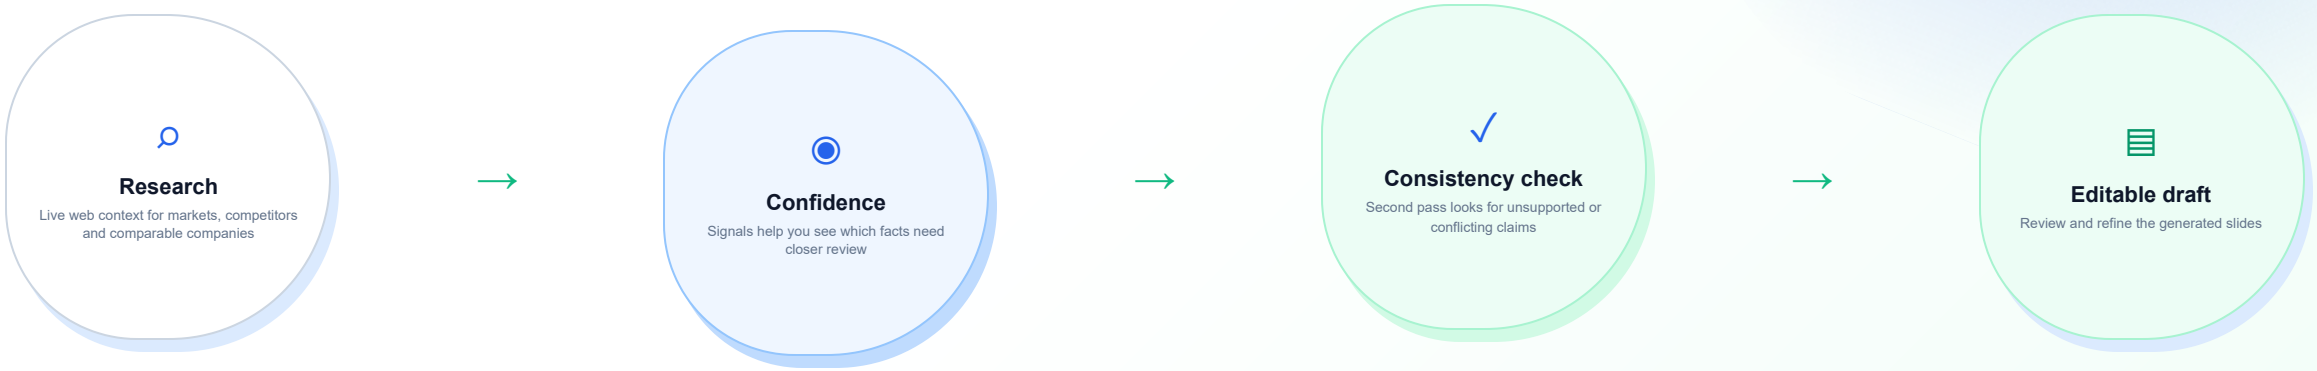

Label styles in plain language

Describe how a design feels—editorial, clean, data-led—so someone can choose without knowing design terminology.

GIVE RESEARCH ITS OWN VISUAL EXPLANATION

Show how Mint gets from research to a reviewable draft.

Replace long explanatory paragraphs with a simple evidence flow, while keeping the claims accurate and the sample content clearly labeled.

Turn a technical feature into a user benefit.

Keep details like the research pass and confidence signals accessible, but lead with the practical promise: build a draft you can review and improve.

SOURCE → CHECK → REVIEW

Trust standard: no invented customer logos, testimonials or performance metrics. Use the in-product sample deck as proof, and mark its example figures clearly.

KEEP THE FINAL ACTION SIMPLE

From first draft to the file you take with you.

Show how editing, branding and export fit together. Move limitations to clear FAQ answers instead of making them the page's main story.

Refine the deck in Mint

Keep the user in control of the finished message.

- Click and edit slide text in place
- Try different designs without rebuilding content
- Add a logo and photos to the deck
- Reuse company-profile information across deck types

Choose the export for the job

Explain the two export paths plainly so visitors know what they will get.

- Editable PowerPoint .pptx with native text, tables and charts
- In-app image export for a pixel-accurate visual copy
- PDF export is not currently available in Mint

FAQ: answer the last decision questions.

What can Mint create?
13 deck types for fundraising, sales, partnerships and internal decisions.

Can I change the design?
Yes. Apply another of the 40 designs to the same deck.

Can I edit the slides?
Yes. Change text in place and download a native PowerPoint deck.

Does Mint create a hosted investor link?
Not currently. Download and share your presentation file.

Start with your website. Build a deck you can shape.

Three decks on the free plan. No credit card required.
